Building hardware –

Lever handles and knob furniture – Requirements and test methods

Report reference No. ..... :	141212054GZU-008
Tested by (name and signature)..... :	Credy Chen
Approved by (name and signature) .. :	Blusea Dong
Date of issue..... :	July 20, 2016
Contents ..... :	Total test report 11 pages including: Report text: 6 pages Appendix A for product photos and drawings: 4 pages Revision Page: 1 page
Testing Laboratory name ..... :	Intertek Testing Services Shenzhen Ltd. Guangzhou Branch
Address..... :	Block E, No.7-2 Guang Dong Software Science Park, Caipin Road, Guangzhou Science City, GETDD, Guangzhou, China
Testing location..... :	Same as above
Applicant's name..... :	NICKAL S.A.
Address..... :	Chemin Champs Lovats 5, 1400 Yverdon-les-Bains, Switzerland
Test specification	
Standard ..... :	EN 1906:2012
Non-standard test method ..... :	N.A.
Test Report Form No..... :	TTRF EN 1906: 2012 A
TTRF Originator..... :	Intertek Testing Services Shenzhen Ltd. Guangzhou Branch
Master TTRF..... :	Dated 2015-12
Test item description ..... :	Lever handle

Summary of testing

The submitted samples **COMPLIED** with all applicable mechanical clauses of EN 1906:2012 for its classification.

Test item particulars

Classification of installation and use.....: Intend use in public high frequency used doors

Test case verdicts

- test case does not apply to the test object ..... : N/A
- test object does meet the requirement ..... : P (Pass)
- test object does not meet the requirement ..... : F (Fail)

Testing

Date of receipt of test item..... : November 29, 2014, March 07, 2015 and March 23, 2016

Date (s) of performance of tests ..... : December 12, 2014 to June 15, 2016

General remarks

This report is for the exclusive use of Intertek's Client and is provided pursuant to the agreement between Intertek and its Client. Intertek's responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this report. Only the Client is authorized to permit copying or distribution of this report and then only in its entirety. Any use of the Intertek name or one of its marks for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek. The observations and test results in this report are relevant only to the sample tested. This report by itself does not imply that the material, product, or service is or has ever been under an Intertek certification program.

"(See remark #)" refers to a remark appended to the report.
"(See Appendix #)" refers to an appendix appended to the report.
Throughout this report a comma (point) is used as the decimal separator.

When determining the test result, measurement uncertainty has been considered.

General product information:

3 models of lever handle (listed below), all listed models having the same material and structure, the only difference was the outer shape of handle, the model of '5559.08009/FS' was subjected to full test,
See appendix A product photo and drawing for detailed appearance.

Schedule of Components:

See Appendix A –Product Photos and Drawings for component list and raw material information.

Detail "Ratings" information listed as following:

First digit (Category of use): Grade 3 – high frequency of use by public or others with little incentive to exercise care and with a high chance of misuse, e.g. public office doors;;

Second digit (Durability): Grade 7 – medium frequency of use: 200, 000 test cycles;

Third digit (Door mass): No classification;

Fourth digit (Fire resistance): – Not included in this test report;

Fifth digit (Safety): Grade 1 – Safety applications;

Sixth digit (Corrosion resistance): Grade 4 – very high resistance;

Seventh digit (Security): Grade 0 – no performance determined;

Eighth digit (Type of operation): type U – unsprung furniture.

5	**REQUIREMENTS**		
5.1	General Sets of furniture shall be classified in grades 1 to 4 in regard to performance requirements specified in 5.2 to 5.13.	Refer to Clause 5.2 to 5.13	—
	Materials in products shall not release any dangerous substances in excess of the maximum levels specified in the European material standards.	Informative	—
5.2	Check of spindle and fastening elements The spindle and fastening elements shall be supplied or specified by the manufacturer with every set of lock or latch furniture. The manufacturer shall state clearly the door thickness or range of the door thicknesses for which the furniture is suitable and in the case of spring assisted and spring loaded furniture, the angle of rotation permitted by the design.	Spindle and fastening elements were supplied by manufacturer. Range of door thicknesses: 35 mm to 70 mm.	P
5.3	Rotational torque strength Lock or latch furniture shall show no failure of any component and the lever handles or knobs shall still operate after the test. Lever handles or knobs shall not deform permanently more than 5 mm as measured at 50 mm±2mm from the axis of rotation by the dial gauge. Category of use acceptance criteria:	Rotational torque 40 Nm. Permanent deformation: 2,7 mm	P

5.9	Repeat test of axial strength of lock or latch furniture and methods of fixing The lock or latch furniture shall meet the requirement of 5.4.	Axial load: 800 N. Permanent deformation: 0,6 mm	P
5.10	Repeat test of free play measurement The lock or latch furniture shall meet the requirement of 5.5.1	Maximum movement: 0,8 mm	P
5.11	Repeat test of measurement of free angular movement or misalignment The lock or latch furniture shall meet the requirement of 5.6.	Maximum movement: 0,5 mm	P
5.12	Repeat test or torque of return mechanism The lock or latch furniture shall meet the requirement of 5.7.	Unsprung lever handles: Return moment: <0,5 Nm	P
5.13	Axial strength for safety furniture (optional) Category of use acceptance criteria: Grade: 1 / 2 / 3 / 4 Axial load (N): 1500 / 2500 After test, there shall be no failure of any component and the furniture shall remain fixed to the test block. The lever handle or knob need not operate after completion of the test.	Safety application: 2500 N. Remain fixed to the test block	P
5.14	Corrosion resistance Corrosion resistance shall comply with requirements of EN 1670:1998.	After 240 hours exposure, no visible corrosion was found on the surface which are visible when fitted in service Grade 4. *the fasteners was not evaluated.	P
