Dear Mister Busseni

We have concluded the certification on the basis of the documents that you have placed at our disposal. You will find now the certification report, the declaration of conformity and invoice enclosed.

According to the scope of application defined in our ZW125 regulations, which is in accordance with the requirements of EN ISO 15875, the permissible operating temperature had to be reduced to 70 °C.

During the renewal, the adaptation of the certification report as well as the more detailed overview of the certified products on the second page of the certificate resulted in additional work.

We ask to consider the provisions on third-party monitoring (Terms & Conditions ZW101, cipher 4.3) and that for this product you are obligated to lead about received complaints and their possible recovery, recording which can be seen by us at any time (Terms & Conditions ZW101, cipher 5.5).

We hope to be able to serve you thereby and be available for possible questions gladly.

Sincerely Yours
Swiss Gas and Water Industry Association
